Product Overview

With a range of proprietary aluminium batten and cladding profiles, Alteria Signature Aluminium Systems have been designed with all the complementary accessories and trims to ensure not only a more efficient installation, but a facade that will look great and last for years to come.

Application

Alteria Signature Aluminium battens and claddings are non-structural but are suitable for use as a decorative internal linings or as a external cladding for residential and commercial buildings.

Battens

Alteria Aluminium battens are not designed to provide weatherproofing to the building. If weatherproofing is required, battens need to be installed over suitable exterior cladding. Please contact your project engineer for cladding recommendations.

Battens can also be installed directly to most internal linings (eg. Plasterboard) or directly fixed straight to the ceiling grid.

Battens must be secured to a top hat or nogging. It is imperative that they are not just installed to cladding or lining sheet.

The Alteria finishes range includes a wide selection of premium powder coat colours to suit all project requirements, including realistic wood-look options plus many on-trend pearlescent and anodised-look colours.

Claddings

Alteria Aluminium claddings have been designed to be weathertight, however it is essential that a moisture management plan has been completed including the necessary flashings, air barriers, seals and waterproofing sheets to meet the requirements of the BCA. Contact your project engineer for recommendations.

Alteria Aluminium cladding can be installed direct fixed straight to the wall battens or ceiling grid.

Please refer to Alteria Install Guides for further installation advice.

Warranty

Alteria products are built to last and are made in Australia using quality components. By following the care and maintenance instructions, Alteria Aluminium Systems are covered by one of our Signature Warranties.

Refer to the Finishes section for an overview of the warranty periods available for each finish. Visit the Alteria website for full warranty terms and conditions.

Two-Piece Batten & Slat System

There are four main fixing methods available for Alteria Signature Aluminium battens and slats. Please contact Alteria for advice on other fixing methods not provided.

Direct Fix

Direct Fix - Balustrades

Mounting Track Fix

Mounting Track Fix - Acoustic Walls

Support Bracket

Rear Fix

2.2 System Components & Accessories

Below highlights the core components of Alteria's Batten System range.

Two Piece Batten/Slat

Two-piece Batten/Slat System comprising Cover profile and Base profile.

Mounting Track - Standard

If required, Mounting Track can be used to secure the vertical two piece batten/slat to the wall.

Required for Mounting Track Fix only.

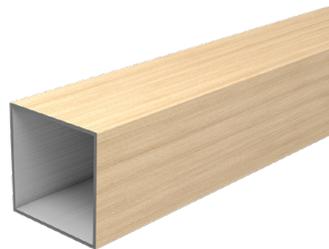

Can be used for external and internal applications.

One Piece Batten

One piece batten.

Available in 30x30mm, 50x50mm, and 50x100mm.

Mounting Track - Acoustic

If required, Mounting Track can be used to secure the vertical two piece batten/slat to the wall.

This track includes a proprietary design to accommodate an acoustic panel.

Required for Mounting Track Fix only.

Can be used for internal applications only.

End Cap - Friction Fit

Colour matched aluminium friction fit end caps offer a concealed fit without an exposed screw.

Available for all profiles and sizes.

Fixing Screw

Battens/Slats need to be fixed securely to suitable substrate using specific fasteners depending on the substrate material.

End Cap - Screw Fit

Colour matched aluminium screw fit end caps with colour matched screws available.

Not available for 30mm two piece battens; Slat range, Joiner batten range or One piece hollow sections.

Support Brackets

L shaped support bracket to securely attach the batten base to a support substrate.

Suitable for Support Bracket Fix installation.

There are specific support bracket sizes based on the batten size selected.

Contact Alteria for advice.

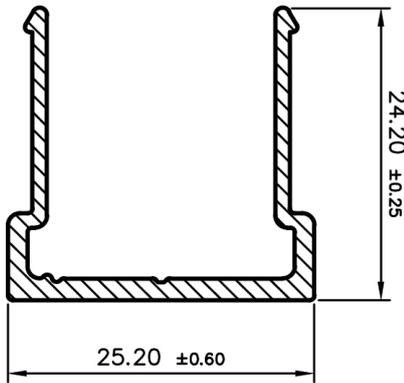

Two-Piece Batten & Slat System

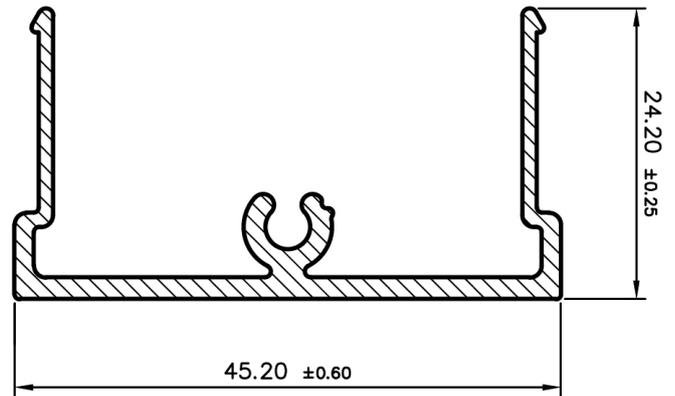

2.3 Batten & Slat Base

The batten base are available in two sizes. The 30mm batten base is to be used with all batten profiles in the 30mm series. In the 50mm series there is a 50mm Standard Base that is used for 50x50mm, 50x100mm and 50x150mm and a 50mm Heavy Base that is used for the 50x200mm and 50x200mm Joiner profile.

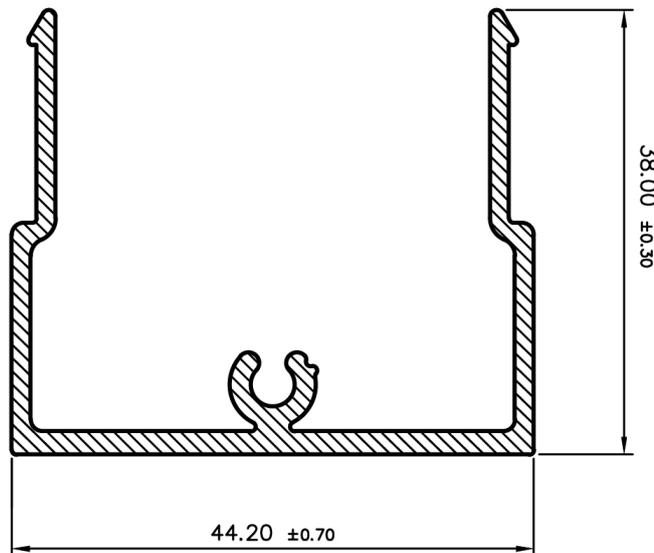

30mm Batten Base

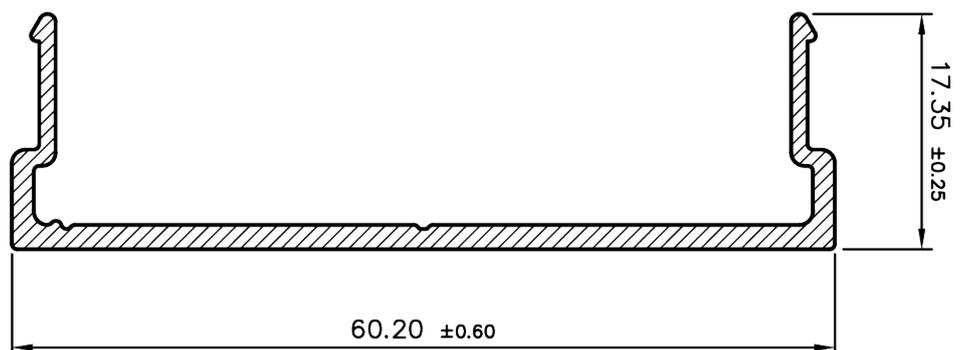

50mm Batten Base - Standard

50mm Batten Base - Heavy
Suitable for 50x200mm and
50x200mm Joiner Batten only

19mm Slat Base
Suitable for 65x19mm
and 90x19mm Slat only

Australian Standard Compliance - AS1562.1:2018	Alteria Aluminium Cladding Systems meet the requirements of AS 1562.1:2018 - Design and Installation of Sheet Roof and Wall Cladding – Metal. See section 6 for details on Standard compliance.							

*Custom lengths available on request.

Span Tables

4.1 Top Hat Span Tables for Alteria Aluminium Battens

Alteria Aluminium has developed a technical supplement that includes fastener details and maximum fixing spacing span data for the main batten / slat installation methods. The supplement has been designed to be used in conjunction with the Installation Guide and this Technical Data Sheet.

The most recent version of the *Technical Supplement: Span & Fixing Detail* document can be found on the Alteria Aluminium website at alteria.com.au/resources

4.2 Top Hat Span Tables for Alteria Aluminium Cladding

Alteria Aluminium has developed a technical supplement that includes fastener details and maximum fixing spacing span data for Alteria Cladding Boards. The supplement has been designed to be used in conjunction with the Installation Guide and this Technical Data Sheet.

The most recent version of the *Technical Supplement: Span & Fixing Detail* document can be found on the Alteria Aluminium website at alteria.com.au/resources

5.1 Finishes Overview

Alteria offers 5 different finish options within our batten and cladding range.

Alteria Finish Range	Evolve	Meridian	Aurora	Lumi	Essentials 25	Essentials 10
Powder Coat Technology	Interpon D2525 STF	Interpon D2525 WGF	Interpon D2525 Flat Matt	Interpon D2525 Futura	Interpon D2525 Futura	Interpon D1000
Powder Type	Powder Coat - Polyester					
Finish Effect	Wood-Look	Wood-Effect	Anodised-Look	Pearlescent	Solid Colour	Solid Colour
Coating Type	Sublimated Powder Coating	Powder on Powder Coating	Powder Coating	Powder Coating	Powder Coating	Powder Coating
Signature Warranty Level	Signature 15	Signature 25	Signature 25	Signature 25	Signature 25	Signature 10
Durability Warranty	15 years*	25 years	25 years	25 years	25 years	10 years
Colour Warranty	15 years*	15 years	15 years	15 years	15 years	10 years
System Warranty	15 years	15 years	15 years	15 years	15 years	15 years
Product Use	Any building, any height. All BCA classes.					Suitable for BCA Class 1 and 10 buildings.
Performance Specifications	AAMA2604, AS371					AAMA2603, AS3715, AS4506,
Coating Thickness	60 – 80 microns / 0.1mm					50 – 70 microns
Exterior Durability	5 years Florida exposure – AAMA 2604. Excellent Performance. Colour change $\Delta E < 5$, gloss retention $> 30\%$. Chalking – no $>$ no.8 ASTM D4214 - D659					AS3715. Excellent - pass after 12 months continuous exposure with no film breakdown or reduction in protective properties.
Colour Stability at Elevated Temperatures	Excellent for continuous exposure up to 120°C.					
Salt Spray	AAMA2604 Clause 7.8.2. ASTM B117 at 350C D1654. Pass at 3000 hrs. No corrosion $> 1-2$ mm from scribe. Minimum blister rating 8					AS3715 Section 2.5.10. Pass 1000 hours. No corrosion creep more than 2mm from scribe
Constant Humidity Resistance	AAMA2604 Clause 7.8.1. ASTM D2247, ASTM D714. Pass at 3000 hrs – blister formation $<$ "few" size no 8					AS3715 Section 2.5.7. Pass at 1000 hrs. No blistering or loss of adhesion
Permeability	AS3715 2002 Section 2.5.11. Pass					N/A
Sulphur Dioxide	ISO3231 (Kesternich). Pass - no blistering, loss of gloss or discolouration.					N/A
Chemical Resistance	Generally good resistance to acids, alkalis and oils at normal temperatures					N/A
Fire Properties - Coating Only	Interpon D2525 Flame Propagation Testing. AS/NZS 1530.3 – 1999. Spread of Flame – 0. Heat Evolved Index – 0 See Section 6.0 for full Alteria fire performance details					

* Refer to Alteria Warranty document for full details.

Interpon Product Data Sheets and Material Safety Data Sheets available on request.

Finishes

5.2 Evoke Range

The Evoke range offers a striking wood-look powder coat finish that is beautiful, realistic and extremely low maintenance.

Finish Colours

American Walnut

Black Walnut

Spotted Gum

Spruce

Dark Ash

Driftwood

Western Red Cedar

White Oak

Ironbark

Natural Oak

Cuban Cedar

Cypress Pine

Queensland Kwila

Silver Acacia

Ebony Blackwood

European Oak

Tasmanian Oak

True Fir

Natural White Ash

Osage

Finish Colour Properties

Finish Name	Colour Code	Finish

Autumn Oak	AM209P	Wood-Effect
Chocolate Oak	AM210P	Wood-Effect
Dark Oak	AM211P	Wood-Effect
Charcoal	AM212P	Wood-Effect

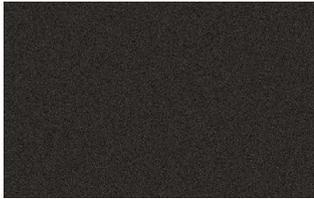

Finishes

5.4 Aurora Range

The Aurora range includes an alluring selection of anodised-look colours with a beautiful metallic flat matt finish.

This range uses Interpon Flat Matt, a series of advanced durability powder coatings specifically designed to give a low gloss "anodised" appearance on architectural aluminium components. Providing outstanding weathering resistance, Interpon Flat Matt typically exceeds the requirements of AAMA2604.

Finish Colours

Black Shimmer

Deep Bronze Shimmer

Gold Rush Glow

Golden Glitz

Latte Glow

Linen Shimmer

Mid Bronze Shimmer

Scintillating Champagne

Finish Colour Properties

Finish Name	Colour Code	Finish	R	G	B	LRV
Linen Shimmer	AA301FM	Flat Matt	222	224	218	73%
Gold Rush Glow	AA302FM	Flat Matt	169	141	95	27%
Golden Glitz	AA303FM	Flat Matt	133	119	92	22%
Scintillating Champagne	AA304FM	Flat Matt	135	127	114	25%
Latte Glow	AA305FM	Flat Matt	103	99	88	15%
Mid Bronze Shimmer	AA306FM	Flat Matt	87	80	66	11%
Deep Bronze Shimmer	AA307FM	Flat Matt	67	65	56	6%
Black Shimmer	AA308FM	Flat Matt	48	53	51	4%

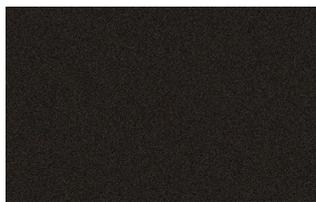

Finishes

5.5 Lumi Range

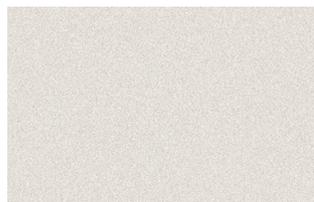

Our Lumi range offers a decorative collection of pearlescent colours with a shimmering matt finish.

This range uses Interpon D2525 Futura™ is a series of advanced durability powder coatings specifically designed for use on architectural aluminium components. Providing new levels of weathering resistance, Interpon D2525 Futura™ typically exceeds the requirements of AAMA2604.

Finish Colours

Ash Pearl

Dove Grey Pearl

Espresso Bronze Pearl

Pearl Champagne

Compliance & Certifications

6.1 Compliance & Certifications - Battens

NCC Compliance

The National Construction Code of Australia (NCC) sets the minimum requirements for safety, health, amenity, and sustainability in the design and construction of new buildings and building work in existing structures across Australia.

Alteria Aluminium battens and slats have been designed, tested, and manufactured to withstand the country's demanding climatic and geographic conditions. They offer building designers, builders, and owners with confidence that they are specifying a product that meet the requirements of the National Construction Code of Australia and the relevant Australian Standards for both residential and non-residential buildings.

Alteria Aluminium Battens have been tested to comply with the following BCA Provisions:

Wind Load Specifications

Alteria have demonstrated through certification in accordance with the below standards that Alteria Aluminium meets compliance with AS 1562.1 and F3D5 & H2D6(4).

Standard	Reviewed by	Date	NCC Provision	Result
AS/NZS 1170.0:2002	Robust Engineering Pty Ltd	Mar 2025	AS 1562.1 and DTS F3D5 & H2D6(4).	Creation of Maximum fixing spacing tables that provides calculations in relation to the maximum batten spacing / fixing spacing tables for the purposes of meeting compliance with AS 1562.1 and F3D5 & H2D6(4).
AS/NZS 1170.1:2002	Robust Engineering Pty Ltd	Mar 2025	AS 1562.1 and DTS F3D5 & H2D6(4).	
AS/NZS 1170.2:2021	Robust Engineering Pty Ltd	Mar 2025	AS 1562.1 and DTS F3D5 & H2D6(4).	
AS/NZS 1664.1 - 1997	Robust Engineering Pty Ltd	Mar 2025	AS 1562.1 and DTS F3D5 & H2D6(4).	

A copy of the *Technical Supplement: Span & Fixing Detail - Battens & Slats* document can be found on the Alteria Aluminium website at alteria.com.au/resources

Non-Combustible Building Elements

Alteria Aluminium comply with NCC deemed to satisfy provisions for C2D10(1)(a) (Volume 1) and H3D2 (Volume 2) for Non-combustible building elements and have the received testing reports from accredited testing laboratories.

Standard	Reviewed by	Date	NCC Provision	Result
AS 1530.1-1994	CSIRO	Oct, 2023	DTS C2D10 & DTS H3D2	Combustibility Test for Material demonstrates the product Alteria Aluminium is NOT deemed COMBUSTIBLE
AS 1530.3-1999	CSIRO	Dec, 2023	DTS C2D10	Ignitability Index: 0 Spread of Flame Index: 0 Heat Evolved Index: 0 Smoke Developed Index: 2

Fire Hazard Properties

Alteria Aluminium comply with NCC deemed to satisfy provisions for C2D11 for Fire Hazard Properties and have the received testing reports from accredited testing laboratories.

Standard	Reviewed by	Date	NCC Provision	Result
AS 5637.1-2015	BRANZ	Nov, 2023	DTS C2D11	Classification Group 1 Smoke Growth Rate Index Less than 250 m ² /kg limit Mean Average specification Extinction Area 138.9 m ² /kg
AS 1530.3-1999	CSIRO	Dec, 2023	DTS C2D11	Ignitability Index: 0 Spread of Flame Index: 0 Heat Evolved Index: 0 Smoke Developed Index: 2

Compliance & Certifications

6.2 Compliance & Certifications - Claddings

NCC Compliance

The National Construction Code of Australia (NCC) sets the minimum requirements for safety, health, amenity, and sustainability in the design and construction of new buildings and building work in existing structures across Australia.

Alteria Aluminium claddings have been designed, tested, and manufactured to withstand the country's demanding climatic and geographic conditions. They offer building designers, builders, and owners with confidence that they are specifying a product that meet the requirements of the National Construction Code of Australia and the relevant Australian Standards for both residential and non-residential buildings.

Alteria Aluminium claddings have been tested to comply with the following BCA Provisions:

- Weatherproofing - Wall Cladding - see below
- Non-Combustible Building Elements - see pg 6
- Fire Hazard Properties - see pg 6

Weatherproofing – Wall Cladding complying with AS 1562.1

Alteria Aluminium comply with NCC deemed to satisfy provisions for F3D5 (Volume 1) and H2D6 (Volume 2) for Weatherproofing – Wall Cladding, complying with AS1562.1

Alteria's cladding system meets the requirements of AS 1562.1 when installed according to these guidelines.

Standard	Reviewed by	Date	NCC Provision	Result
AS 1562.1:2018	Acronem Consulting Australia Pty Ltd	Mar 2025	AS 1562.1 and DTS F3D5 & H2D6(4).	Appraisal Report* providing certification that Alteria Cladding System is in accordance with the below Wind Load specifications & AS 1562.1:2018 and demonstrates that the product is compliant with AS 1562.1 and F3D5 & H2D6(4)

Wind Load Specifications

Alteria have demonstrated through certification in accordance with the below standards that Alteria Aluminium meets compliance with AS 1562.1 and F3D5 & H2D6(4).

Standard	Reviewed by	Date	NCC Provision	Result
AS/NZS 1170.0:2002	Acronem Consulting Australia Pty Ltd	Mar 2025	AS 1562.1 and DTS F3D5 & H2D6(4).	Creation of Maximum Fixing Spacing Table Report* that that provides calculations in relation to the maximum batten spacing / fixing spacing tables for the purposes of meeting compliance with AS 1562.1 and F3D5 & H2D6(4)

Warranty

7.1 Warranty Overview

Alteria products are built to last and are made in Australia using quality components. By following the care and maintenance instructions, Alteria Aluminium Systems are covered by one of our Signature Warranties. Alteria Signature Warranties are separated into three levels and are available based on the finish selected and the location of your project.

For full warranty overview visit alteria.com.au/warranty

AVAILABLE WITH:

Meridian Range

Aurora Range

Lumi Range

Essentials 25 Range

AVAILABLE WITH:

Evoke Range

AVAILABLE WITH:

Essentials 10 Range*

*Essentials 10 Warranty is only applicable for BCA Class 1 & 10 Buildings (Single domestic residential dwelling up to 3 storeys).

Care & Maintenance

8.1 Maintenance Requirements

Cleaning should start at the time the products are installed, ensuring that construction materials such as concrete, plaster and paint splashes are removed before they have a chance to dry.

The frequency of cleaning depends in part on the standard of appearance that is required and also the need to remove deposits that could cause damage during prolonged contact with either the powder film or the metal substrate (if exposed).

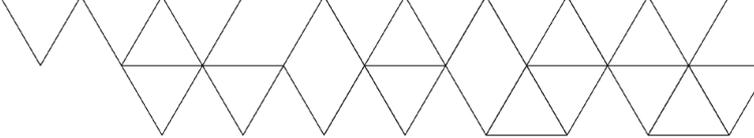

Please Refer to the table below for recommended cleaning requirements. The classification of exterior environments is as defined in AS4312- 2008.

Refer to the Alteria Care & Maintenance Guide for full cleaning requirements.

Category (AS4312)	Corrosivity Level	Environmental Type	Minimum Cleaning Requirements
C1 & C2	Very Low & Low	Non-hazardous Environment	Every 12 months
C3/T	Medium	Typical Environment	Every 12 months
C4	High	Swimming & Leisure Pools / Light Industrial	Every 6 months
C4	High	Coastal Environment	Every 6 months
C5-M	Very High	Beach Front / Marine	Every 3 months
C5-I	Very High	Heavy Industrial Environment	Every 3 months

If you are unsure as to what conditions your project fits into, please contact Alteria.

Disclaimer

The information in this document is a guide only. It is intended for use by builders, cladding installers and other contractors who may be involved with the installation of the Alteria Aluminium fixing system.

If you are an installer ensure that you follow the design, moisture management detail, preparation requirements and materials as set out by the designer. If you are a specifier or a responsible party for the project, please ensure the information in this manual is appropriate for the application you are planning.

As all project conditions are unique, there are likely to be variations to how this product is used, which can affect the use and quality of the products, as such no warranty is given or implied with respect to such situations.

As most of our projects are supply only, we do not have access to all details relating to the final product application, and as such, we can not be held liable for ensuring "fit for purpose" on any given project.

This document is for technical advice only. Alteria cannot accept liability for any inaccurate information within this document or the consequential losses that occur as a result.

Alteria's policy is on of continuous improvement. We therefore reserve the right to alter specifications at any time and without notice. Colours and textures may vary according to light and weather conditions. Owing to this and limitations of the printing process, colours in this brochure may vary.

Please ensure that you have the latest version of this publication by checking that the publication date corresponds with the downloadable version from our website at www.alteria.com.au

In case of doubt, please contact Alteria.
